

How to Convert Videos with Any DVD Converter

Any DVD Converter Pro. is an all-in-one DVD ripper, video converter, audio extractor, YouTube downloader and DVD creator.

Follow the steps to convert any video formats with ease:

Step 1: Download and install Any DVD Converter

Click [here](#) to download Any DVD Converter. After the download is finished, run the **any-dvd-converter.exe** file and follow the installation wizard instructions.

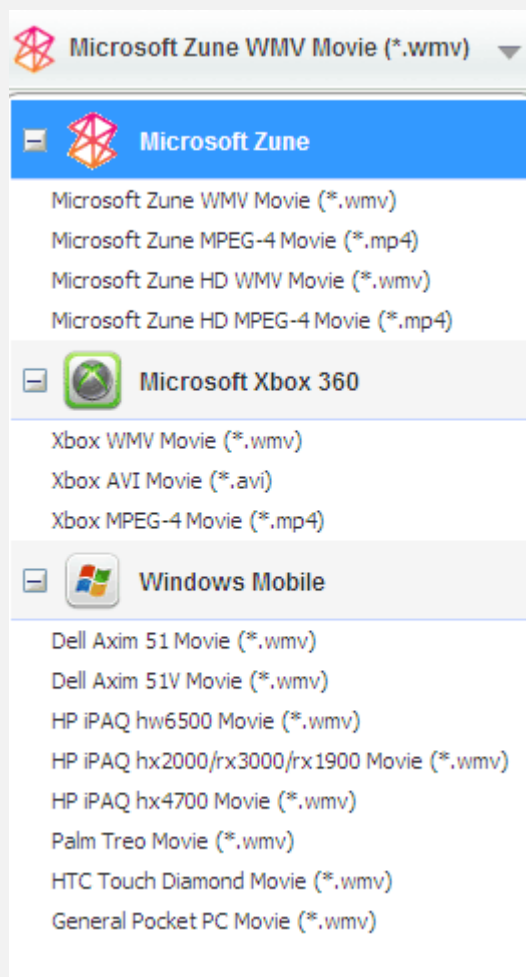

Step 2: Run Any DVD Converter and add your input video file

To select a video you would like to convert, hit the **Add Video** button on the top left corner. In the opened Windows Explorer Window, browse for the necessary video file.

Please note: You can also add batch video files by clicking menu **File > Batch Add Video Files** so that you don't need add input videos one by one. It's more convenient and time-saving.

Step 3: Set up the conversion output profile

After you have selected the input video file, click the button under **Output Profile** on the top right corner to select the output format. In the list of Output Profile, select your desired output format.

[-] General	
Item Name	dvd://1
[-] DVD Options	
Chapter	01-17
Audio Language	Default
Subtitle	None
Angle	Default
[-] Output Duration	
All clip duration	02:02:02
Start Time	00:00:00
Stop Time	02:02:02
[-] Video Options	
Video Codec	WMV V8
Video Size	320x240
Video Bitrate	768
[-] Audio Options	
Audio Codec	WMA 9.2
A/V Sync	Default
Audio Track	Default

Under the preview window field, you can also manually set the output parameters. For novice users it is recommended to select the default parameter.

Step 4: Set up a proper video output folder

Click the menu **File > Set Output Folder** and select a location on your HDD for the output video file. If you don't do this step, the default output folder would be in C:\Documents and Settings\xxx\My Documents\Any DVD Converter Professional.

Step 5: Convert your video files

After you have set up all the conversion output format and parameters, hit the **Convert** button to start converting.

Step 6: Conversion completed

When the process is completed, Click the **Open Output Folder** button in bottom left corner(or right-click the source file in the middle panel and click **Open Destination File Location**. Or click menu **File > Open Output Folder**). Then you would find the converted file.

Now you can transfer the converted file to your portable media player or mobile phone. Just enjoy it.
